equinoxEDU

Equinox provides ongoing educational opportunities through equinoxEDU, including live webinars, workshops, and online resources.

Koha

Koha is the first free and open source library automation package. Equinox's team includes some of Koha's core developers.

Evergreen

Evergreen is a unique and powerful open source ILS designed to support large, dispersed, and multi-tiered library networks.

Fulfillment is an open source interlibrary loan management system. Fulfillment can be used alongside or in connection with any integrated library system.

CORAL is an open source electronic resources management system. Its interoperable modules allow libraries to streamline their management of electronic resources.

“

FOLIO is an open-source library services platform that integrates print and electronic resource management.

It includes core library management functionality, is built on a modern architecture to ensure continuous innovation, and supports the integration of applications from third-party providers.

EBSCO provides implementation, hosting and support for FOLIO.

About Open Library

- ▶ One web page for every book ever published – a lofty but achievable goal.
- ▶ To build Open Library, hundreds of millions of book records, a wiki interface, and lots of people who are willing to contribute their time and effort to building the site are needed.
- ▶ To date, Open Library has gathered over 20 million records from a variety of large catalogs as well as single contributions, with more on the way.
- ▶ Open Library is an open project: the software is open, the data are open, the documentation is open, and your contributions are welcomed. Whether one fixes a typo, add books, or write widgets--it's all welcome. There is a small team of fantastic programmers who have accomplished a lot, but they can't do it alone!
- ▶ *Open Library is a project of the non-profit [Internet Archive](#), and has been funded in part by a grant from the [California State Library](#) and the [Kahle/Austin Foundation](#).*

<https://www.oercommons.org/>

publish high-quality, peer-reviewed, openly licensed college textbooks that are absolutely free online and low cost in print – has developed a low-cost, research-based courseware that gives students the tools they need to complete courses

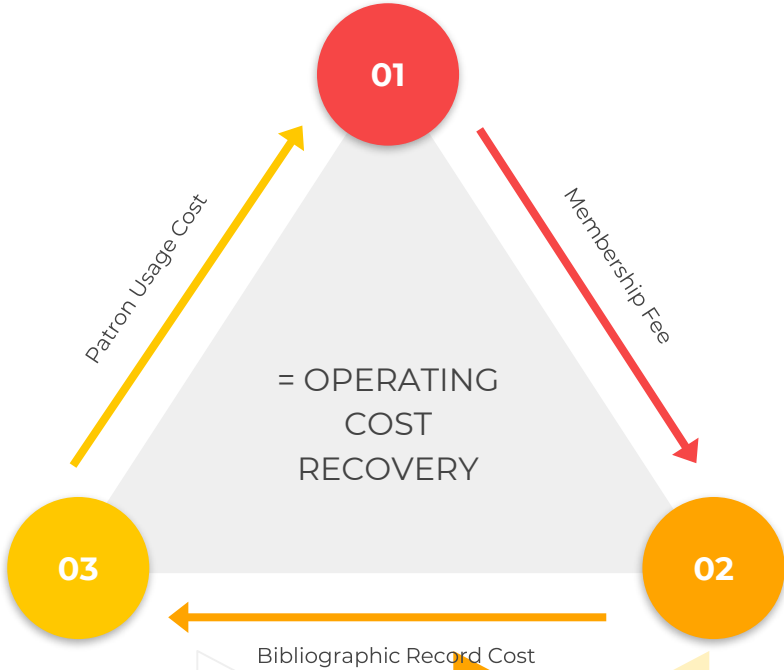

Is free and supported through the support of higher education institutions, professional organizations and industries from around the world, led by California State University. It is an international community which wishes to discover, use and share Open Educational Resources (OER) and other online resources for the improvement of technology-enhanced teaching and learning.

Cost Formula Committee

Exploring Operating Cost Formulas

Current Cost Formula for ODIN Operating Expenses

Ex Libris bills on these 4 items & their counts

FTE	# of BIBS	Named Users	Unique e-Journals
Students, Staff & Faculty per NDUS or IPEDS	Alma Bibliographic Record Count less unique e-Journal count	Alma/Configuration/General/Staff Login Report	Electronic Portfolios – material type=Journal

SUPPORT

- ▶ ODIN holds contracts for both Ex Libris and Innovative
- ▶ Additional contract work must go through Director or Ass't Director of ODIN & evaluated if work benefits all of ODIN or just individual libraries. Who pays for additional contract work is determined by evaluation.
- ▶ Why is this important? – Ideas that benefit all or most of ODIN will most likely be covered by ODIN monies.
- ▶ Examples of “all-ODIN” vs Individual library
 - ▶ Training Needs
 - ▶ Leganto
 - ▶ Specific work to improve some aspect of a library
 - ▶ etc.
