- Member Updates

UND – CFL – added libchat widget to Primo (went live yesterday). Switched facets to the left. Trying to fix Get It (ILL in Primo) – 50/50 ExLibris and vendor's fault. BSC also reported issues with Get It Issue with ScienceDirect linking.

NDSU: Susanne, Beth, Amy Reese, Tina Gross – Dean search – 3 candidates, on campus interview over next few weeks. Will update on what they're working on in Primo after cataloging/receiving position filled. Also ongoing web developer search

NDSCS: Amy Carson – LibGuide clean up, Archival stuff

BSC: Tina Stockdill – HLC accreditation – gathering evidence. Received Greta Thunberg portrait (unveiling 4/6). It will be in the Reading Room eventually, but starting in the main library area for security. Integrating LibGuides into Bb – working with Kelly – Lets instructors pop LibGuides into course shells but not sure exactly how it works. Back full time. Escape rooms in library instruction. (Amy Carson has done it in the past)

U of J: Amanda – course reserves in Primo – deciding what to put on search home page

DSU: Monica – It still feels like we're waiting for Staci to come back from vacation. I am Acting Director as of 3/1. The position is open with a preference date of 3/27. We are having long, drawn out EBSCO struggles involving Elementary School Journal. We have high hopes that off campus students will have access soon, preferably before Jeanette and I go crazy.

ODIN:

- Announcements:
  - From Ex Libris' Content Monthly Newsletter:
    *Are you familiar with **Quicklinks** in your Discovery system? Quicklinks enables users to go directly to the full text with one click!*
    Over the past months, we have been working hard to add support of Quicklinks to additional providers, focusing on primary publishers such as Elsevier, Wiley, Springer, ProQuest and more. We have successfully reached a milestone of 10 providers (see Quicklinks Provider List) and now span over 1.5 billion records!
    To learn more about this feature, please see: Quicklinks in Summon, or Quicklinks in Primo and Primo VE. Jason hasn't played with it much since they activated it in the sandbox. Unsure if there is still the issue with OA content being sent through the proxy.
  - Leganto and Blackboard – "Node" aware – Everyone would be able to have their own instance without issue.
- Discussion items
  - April meeting – reschedule or just cancel? - Skip April – see you again in May.
- Accessibility Tech Talk – tools to test – anyone who wants to help can contact Jason

- Holding Spot
  - Student Portal UND implementation / Blackboard NDUS upgrade, library impact or sharing?
  - Personalizing results functionality
  - PDFs and accessibility issues per vendor
  - How to locate resources – when through Primo and when through the databases? Monica, Staci (DSU)
